AccelSafety

Integrated Drug Safety and Signal Management Platform

Powered by Oracle Argus Safety™, Oracle Empirica Signal & Topics™, and Axway E2B Gateway on AWS™ Cloud

ORACLE | Partner

AccelSafety is a cloud-based, GxP compliant drug safety platform offered by Techsol using the E2B-R3 compatible Oracle Argus Safety application for the collection, medical assessment and regulatory reporting of clinical & post-marketing safety surveillance data.

All ongoing systems validation and preventive maintenance of Oracle Argus Safety and associated add-on applications will be managed by Techsol throughout the business lifecycle.

Solution Models

With AccelSafety, clients can choose one of the below solution model which can meet their business needs.

AccelSafety Standard

For core Drug Safety operations & e-submissions

AccelSafety Enterprise
